4. Objectives

Hydroform Solutions prides itself on technological innovation in order to produce high quality products in an environmentally responsible manner. Chromium and manganese is integral to the steels that the facility processes. Without these alloys, it would be impossible to make automobiles which meet passenger safety requirements. There are no options identified which will be implemented, however, as part of the continuous improvement program at the facility new opportunities will be reviewed on an on-going basis.

5. Progress in Implementing Plan

This section does not apply since no feasible reduction options are available for implementation at this time.

For information on on-site releases from the facility, as well as disposal and off-site recycling information please refer to National Pollutant Release Inventory's website: <http://www.ec.gc.ca/inrp-npri/>.

As of November 7, 2017, I, Raj Punni, certify that I have read the reports on the toxic substance reduction plans for the toxic substances referred to below and am familiar with their contents, and to my knowledge the information contained in the reports is factually accurate and the reports comply with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under that Act.
