Project No.: 16ELC046

EXECUTIVE SUMMARY

Rollstar Metal Forming manufactures roll formed metal products, incorporating injection molded plastic for the automotive sector at their facility located at 6655 Northwest Drive in Mississauga, Ontario.

In compliance with the Toxics Reduction Act and Ontario Regulation 455/09, this summary is for a new Toxics Substance Reduction Plan based on the 2013 reporting period. This summary includes the statement of intent, objectives of the plan, reason for use or creation, statement for not implementing reduction options, and certifications for the following substances:

- Methyl ethyl ketone, CAS# 78-93-3
- Ethyl alcohol, CAS# 64-17-5, and
- Toluene, CAS# 108-88-3.

The facility currently does not plan to implement any reduction options since no new opportunities for reduction were identified.

2.0 Statement of intent

Rollstar Metal Forming, a division of Martinrea International Inc. is committed to playing a leadership role in protecting the environment. The use of Chromium, Lead, Nickel, and Zinc is an integral part of the products that we manufacture, and it is not technically or economically feasible to reduce. We will continue to use the substance in strict accordance with all applicable environmental regulations.

3.0 Objectives of the plan & any targets

Rollstar prides itself on technological innovation in order to produce high quality products in an environmentally responsible manner. This plan will determine the technical and economic feasibility of identified reduction options to determine which, if any, are viable

for implementation at this time. As part of the continuous improvement practices at the facility, technical advances will be monitored for new opportunities to reduce the use of Chromium, Lead, Nickel, and Zinc at the facility.

4.0 Reason for Use or Creation of Toxic Substance

The reported toxic substances including chromium, nickel, lead and zinc are identified as a trace element of the steel materials processed at the facility and considered as an article component. These substances are not created at the facility.

5.0 Statement for Not Implementing Reduction Options

Rollstar's commitment to continuous improvement has resulted in an extraordinary lean and efficient manufacturing facility. The facility's continuous improvement measures, coupled with the acknowledgment that the customer provides the specifications for the raw materials processed at the site mean that there are no additional options for the facility to implement. However, the facility will continue to make improvements to processes and programs when feasible.

6.0 Estimated Reductions for Options Selected

Not applicable since no feasible options were identified for implementation.

7.0 Timelines for Achieving Estimated Reduction

Not applicable since no feasible options were identified for implementation.

8.0 Contents of this Plan Summary Reflects Plan

The plan summary accurately reflects the Toxic Substance Reduction Plan dated December 19, 2014, prepared for the substances identified in Section 1 of this plan summary.

9.0 Certifications

A copy of the certifications signed by the highest ranking employee and licensed planner are attached to the end of this summary.
